

# MyPortfolio

## Project Description:

- MyPortfolio is a website built for showcasing detailed description of my technical knowledge.
- This project is developed as part of learning, understanding and implementing Frontend Web Development technology.
- This is first version of my portfolio.
- Tech used: HTML 5, CSS 3, GitHub

## Learnings:

- Understand how websites work and how HTML, CSS contribute for its functioning.
- Understand how HTML acts as blueprint of the website and how CSS beautifies it.
- Learn HTML and CSS best practices.
- Enables developers to ensure the HTML structure and style elements are applied consistently across several web pages.
- Learn to deploy website on GitHub.
